

SPIDA[®]calc: Intuitive Modeling and Design

Design new poles and model changes quickly and easily for better results.

Intuitive assemblies

- Reduce design time by using standard or custom assemblies to quickly create a single pole design or an entire pole line at once

Compare designs

- Identify differences between solutions in Comparison View
- Ideal for quality control on your deliverables

Wire sag

- Ensure compliance with maximum wire tension checks and define tension by sag and temperature
- Generate wire sag charts and detailed tension reports
