

SPIDA[®]calc:

Pole Loading Design Made Simple

Take advantage of the unique platform to make your projects easier.

Superior user interface

- Create overhead designs using intuitive drag and drop functionality, interact with a live 3D view, or design entire pole lines directly on the map

Profile view

- Quickly calculate clearances with both summer and winter conditions to ensure that requirements are met

Communication bundles

- Create a large variety of communication bundles, simplifying building and reporting

Connectivity

- A connected environment allows users to create, add, and modify an entire pole line at once without repetitive modeling
