

SPIDA[®] silk: PLAN WITH PRECISION

Work with confidence
and spend less time
in the field.

Wire-mounted equipment modeling

- Model objects, such as 5G antennas or marker balls, and place them anywhere along the span
- Gain insight into the impact of these attachments on both the sag and tension of the wire

Model communication bundles

- Quickly and easily define communication bundles and overlying
- Set a constraint for a complete bundle or explicitly set the initial messenger tension
